

REALTIME BODY WORN CAMERA WITH VMS INSIDE

On-the-Go Recording& Real-time Video Streaming

Patrol records are now preserved in visual format to prevent potential disputes. During emergencies, the operation center can instantly review video recordings, gaining insight into the on-site situation.

Support for SIP Client Multi-party Communication

In case of emergencies, use the SOS button or Push to Talk key to communicate with other LiveEdge+ users and quickly connect with the operation center for assistance.
